Search item:

Enter either a part (or the whole) sku or product name in the field above. If there is only one product matching the search it gets added to the order, otherwise a pop-up window with all matching products is brought up.

Select product			
Name	Price	sku	pk
s	4.0€	1234	8
s	0.2€	1234	1
<input type="text"/>			
<input type="button" value="Accept"/>			

In the pop-up window press the product you want to add to the order and then press accept.

Add discount to product:

Fill in the discount in € you want to add to the product. Make sure to use "." and not ",". Select the product in the order that you want to add the discount to, before you press the button.

Subtract cash payment from order:

Enter the amount of cash that the customer has given you and when you press the button, it will be reduced from the order total.

Pay with bonus card:

Enter the amount of bonus points you want to take from the order.

Pay with card:

Allows the customer to be able to pay the current price of the order using the card reader.

New order:

Starts a new empty order

Save order:

Saves current order and makes it possible to bring it up later

View orders:

View saved or completed orders

Opens nearly identical pop-up window as the products, choose order based on customerID and press accept.

Print receipt:

After the order has been paid for, it is possible to print the receipt using this button if the customer wants it???

Adminstage:
